

How to put on a Bella Boot:

- Hold the boot with the white Velcro facing forward.
- Slip the boot over the dog's paw and leg until the paw is all the way in. The boot should fit so that the paw slips in easily, but not be too over sized.
- If your dog has furry legs, cover the white velcro with the strap until you have slipped the boot over your dog's paw.
- Wrap the strap behind the boot.
- Pinch the excess fabric at the back of the boot together, keeping the front (white Velcro side) smooth.
- Pull the strap taut, and attach to the white velcro on front.
- Trim strap if needed.
- The boot may be slippery when first put on. As soon as it is worn outside on the street the bottom of the boot will rough up.
